

# Create a Search of Locations of Interest

Searching is key functionality you will use in 25Live to find events, locations, resources, and organizations. Let's start our work by creating a location search that relates to scheduling you will be doing.

Note the **Go to Search** button available on most pages in 25Live. Clicking that button takes us to a page where we can run or create searches. In this case, we want to create a location search.

A screenshot of the search interface. The "Select Object:" dropdown is set to "Events". A dropdown menu is open showing options: Events, Locations, Organizations, Resources, and Tasks. The "Quick Search" toggle is turned on. The search input field contains "Search Events". There are buttons for "More Options", "Reset", "Save As", and "Search".

You can create a quick search by adding some portion of the building name

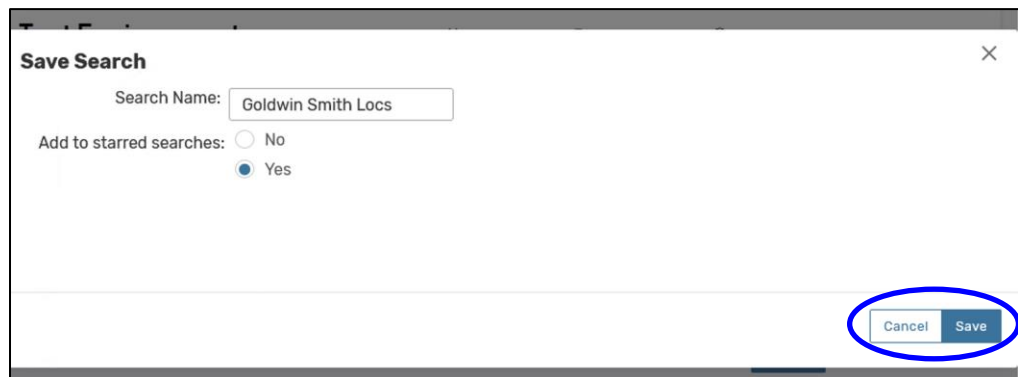

A screenshot of the search interface for "Locations". The "Select Object:" dropdown is set to "Locations". The "Quick Search" toggle is turned on. The search input field contains "goldw". Below the input field, there is a hint: "Hint! Type :: to use SeriesQL." and a message: "Search has not been saved". There are buttons for "Reset", "Save", "Save As", and "Search". Below the search bar, there are tabs for "List", "Calendar", and "Availability". The "List" tab is selected. There is a "Choose Columns" button. A table with 7 columns is displayed: Name, Formal Name, Categories, Features, Layouts, and Max Capacity. The table contains two rows of data.

	Name	Formal Name	Categories	Features	Layouts	Max Capacity
☆	<a href="#">GSH122</a>	Goldwin Smith Hall 122	Building - Goldwin Smith Hall, Campus - Ithaca, Schedule25 Bulk Scheduled Rooms, Type - Classroom		Instruction	26
⌵	<a href="#">GSH124</a>	Goldwin Smith	Building - Goldwin		Instruction	26

To see the number of items returned by your search, scroll to the bottom of the page.

A screenshot of the pagination controls. It shows "21 Matching Locations" and "Page 1 of 1". There are buttons for "First", "Previous", "1", "Next", and "Last". Below these buttons, there is a label "Items per page" and a dropdown menu set to "25".

Save the search by clicking on **Save** or **Save As** and entering a descriptive name for the search.

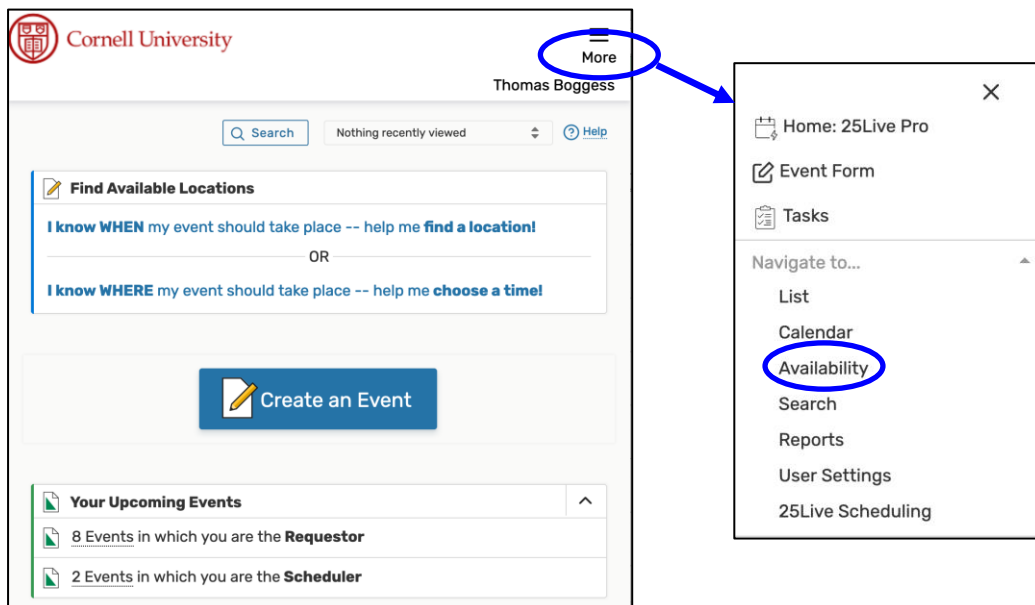

A dialog box titled "Save Search" with a close button (X) in the top right corner. It contains a "Search Name:" label followed by a text input field containing "Goldwin Smith Locs". Below this is a section "Add to starred searches:" with two radio buttons: "No" and "Yes". The "Yes" radio button is selected. At the bottom right, there are two buttons: "Cancel" and "Save". The "Save" button is circled in blue.

You can use that saved search throughout the system.

## Location Availability

Let's look at the availability of the locations returned by your search.

Click on the **More** menu and select **Navigate to... Availability**

The image shows the Cornell University 25Live Pro interface. At the top left is the Cornell University logo. To its right is the user name "Thomas Boggess". Below the user name is a "More" menu icon, which is circled in blue. A blue arrow points from this icon to a dropdown menu. The dropdown menu contains the following items: "Home: 25Live Pro", "Event Form", "Tasks", "Navigate to..." (with a sub-menu arrow), "List", "Calendar", "Availability" (circled in blue), "Search", "Reports", "User Settings", and "25Live Scheduling". The main content area of the interface includes a search bar, a "Find Available Locations" section with two options: "I know WHEN my event should take place -- help me find a location!" and "I know WHERE my event should take place -- help me choose a time!", a "Create an Event" button, and a "Your Upcoming Events" section showing 8 events as Requestor and 2 events as Scheduler.

- Related Event Orange
- Pending Event Purple
- Blackout Grey
- Closed Hours Grey

Select one of the location searches available in the dropdown list above the grid. The locations shown is from my saved search for Goldwin Smith Hall. A day was chosen during the Spring 2020 term to demonstrate availability with classes loaded.<sup>1</sup> Note the Legend button to the left of the search dropdown.

Summary information for locations or events can be viewed by hovering over the relevant item.

To return to the availability grid, use the **More > Availability** menu at the top right of the page or click the browser's back arrow or create a new search using Go to Search.

## Availability Grid views by Users-General or Users-Enhanced

There are roughly five levels of access to 25Live: general access users (the default), enhanced access users, schedulers, ERP approvers, and administrators

General access users can see only event details on events they have created.

ERP approvers have rights to assign ERP resources and see all events but, generally, not assign locations

## Activity 2A

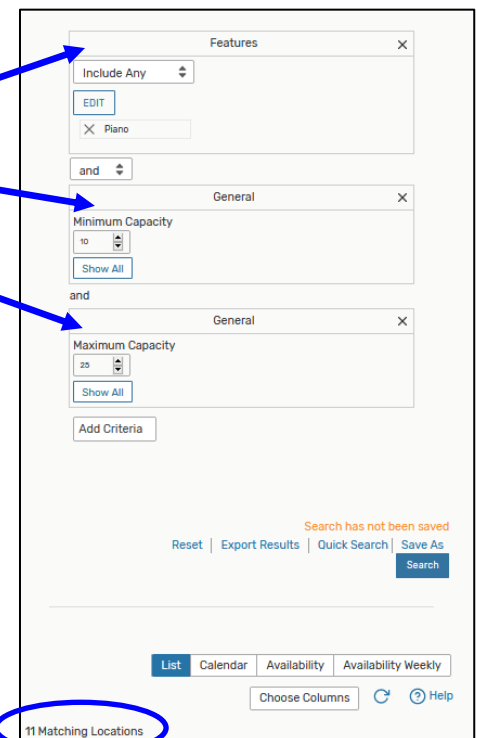

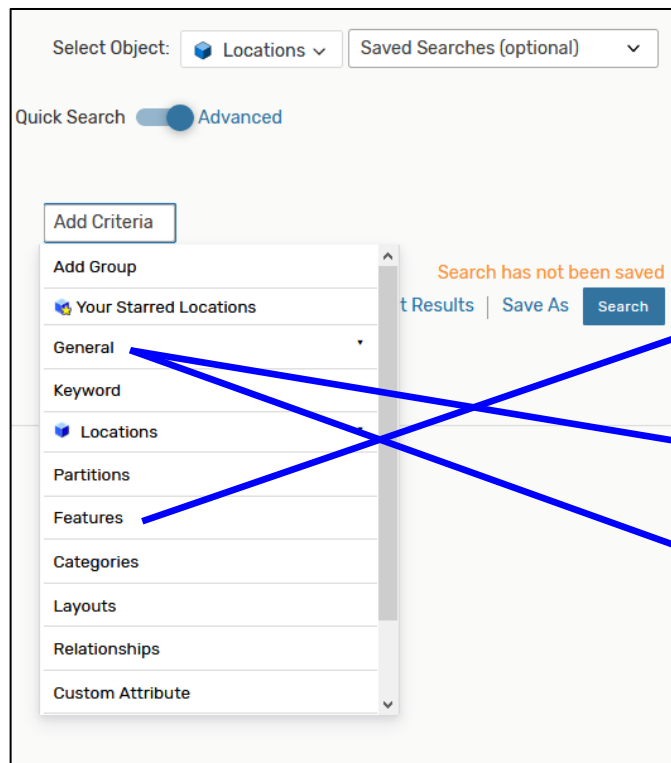

1. What was the name of the Location Search you created?
  2. What might you do to limit or increase the number of locations in your search?
  3. We viewed a daily basic location availability grid. Did you notice a way you might view a weekly availability grid?
  4. From the 25Live location details page, how would you navigate back to the grid
- Bonus: When searching for locations, what happens when you enter a word that is used in multiple location names? Can you provide an example?

## Additional Search Options

 Go to Search

Return to the search page using the **Go to Search** button and select a Location search. You may have noticed the **Quick Search** ☐ **Advanced** ☒ slider below the "Select Object" dropdown. When you want to make your search more precise, you can add criteria by

sliding the bar toward "Advanced" and clicking the Add Criteria button. Here, you could search for locations with specific features (like a piano) or room size (capacity between 10 and 25) or both.

## Activity 2B

1. Create a location search using the category for "Outdoor Space"
  - a. How many 25Live Outdoor locations were returned?
  - b. Can you further limit the search to return only those that have a "Q" in their name? How many were returned?

Bonus: Using search criteria save a new location search to return all the locations in your area with a capacity less than 25.
